BY REV. GEORGE HUNTER.

[Continued.]

In larger communities the principle of love would effectuate a mighty change .-That spirit of jealousy and selfishness, of avarice and monopoly, which now produces so many jarrings, contentions and collisions of interests among town councils, corporations, and other smaller associations, would cease to operate. Every one would see and feel, that the prosperity of the whole also the prosperity of every portion of the general community. Boisterous disputations, sneers, hisses, reproaches, and angry passions would be banished from the deliberations of every society; and caudour, good-will, and kindly affections would animate the minds of all its members.

The mutual intercourse of nations would be established on the principle of friendship and affection, and on the basis of immutable justice and eternal truth. Raised

Under the influonce of the reign of love, the instruction of all ranks, in every department of useful knowledge, would be rapidly promoted; ignorance and error, with all their attendant evils, would soon vanish from the minds even of the lowest orders of society; seminaries would be erected and established on a liberal basis, for Instructing every class of mankind in all those branches of science which tend to expand the capacity of the human mind, and to extend the range of its contemplations; the hours of active labor would be atridged, in order that they might have leisure for the cultivation of their understanding and the exercise of their moral powers. Sweeter far in Heaven.

It was evening. We were seated alone t the piano, breathing a song of beauty and joy : and as our fingers glided gently up the silver-keyed octaves, and music, "the soul of beauty," gushed forth responsive to our touch, it seemed that nowhere in this glad earth could there be hearts beating heavily-so light and joyous were our own. The last echo had died away in the distance, and turning from the instrument, our eye res'ed upon the silvered locks and bending form of one whose countenance bespoke a pure and noble heart. We had never met before, but he whispered softly, It had been winter with her for a long time while a smile of beauty wreathed his colorless lips, "Young maiden, 'twill be sweeter | but in a few years more I shall have the far in heaven!" The Great Secret Revealed.

The Horse Charm; or, the Secret for Taming Wild Horses.

The horse casto is a wart, or excressence, which grows on every horse's forclegs and generally on the hind legs. It has a peculiar rank, musty smell and easily pulled off. The amonical effavia of the horse seems peculiarly to concentrate in this part, and its very strong oder has a great attraction for animals, especially capine and the herse himself.

For the oil of cumin the horse has an instinctive passion-both are original natives of Arabia, and when the horse scents

the oder, he instinctively draws towards it. The oil of Rhodium possesses peculiar properties. All anima's seem to cherish fondness for it, and it exercises a kind of subduing influence over them.

The directions given for taming horses are as follows :

Procure some horse easter, grate it once. Also get some oil of Rhodium and oil of cumin and keep the three seperate Still the jail was secure in the hands of the in airtight bottles.

Rub a little oil of cumin upon your hand, and approach the horse in the field front of the jail; and being well filled, it on the windward side, so that he can smell the cumin. The horse will let you come up to him then without any trouble.

Immediately rub your hand gently on the horse's nose, getting a little of the oil

You can lead him anywhere: Give him a little of the castor on a piece of loaf sugar, apple or potatoe. Put eight drops of the oil of Rhodium
